PRODUCT DESCRIPTION

In order to protect the energy resources of the Earth, over recent years the European Union has continuously reduced and continues to reduce the opportunities for marketing traditional tungsten filament products.

Halogen technology is now widespread all over the world, providing an easily accessible light source for everyone. In line with recent trends, our products have an aesthetically pleasing and ergonomic design. In terms of their size and brightness, they resemble traditional light sources, moreover, they provide the same light but with 30% lower energy consumption. Being dimmable, the product can be customized based on personal preferences or features of the space to be lit.
