PRODUCT DESCRIPTION

Avide oyster lamps include a modern, built-in LED light source. --- They are ready to use immediately after connected to the network. Our lamps are equipped with SMD (Surface mounted diode) LEDs representing one of the most modern lighting solutions. SMD technology is characterized by greater light scattering, thus the product can be used to illuminate a wider area. This means that an oyster lamp featuring an SMD LED chip can produce even light in the room in which it is used. ---

The LED ceiling lamps are available with different covers and a great variety of power versions. Optionally, they may also be equipped with a motion sensor that can provide truly convenient operation.

They are available in three types of power versions and sizes, fitted with different diffusers. Both the round and square models are available in 28 cm, 33 cm and 38 cm diameter versions. Due to the great variety of designs, you can surely find the lamp best matching your taste and needs. We recommend our products for illuminating corridors, stairwells and entrances.
